## ***NetworkIP Partners with Dialogic to Expand Platform, Drive Innovation***

Longview, Texas (July 14, 2008) – NetworkIP®, a leading provider of innovative telephony and stored value services, has partnered with Dialogic® to expand its carrier-grade telephony platform in ways that meet a growing demand for its voice, data and IP services.

NetworkIP helps companies quickly bring to market low-cost, next-generation telephony and Internet stored value products incorporating Long Distance Dialing, Web and Audio Conferencing Services, Voice Mail, International Call Back, and VoIP.

NetworkIP award-winning technology delivers the best combination of usage-based pricing, integrated prepaid services and features, call quality, and management control. Customers can create customized individual and business telephony services; provide automated alerts; manage surveys, promotional messages and other audio marketing services; and administer account information and transaction history for a variety of applications. In addition, through its Jaduka subsidiary, companies and web developers can harness communications and technologies to enhance user experience and improve business processes, resulting in greater customer satisfaction and employee productivity.

NetworkIP CEO Pete Pattullo said, “Since day one, NetworkIP has developed innovative and reliable voice services using hardware technologies provided by Dialogic. This partnership enables us to expand our platform and build new technologies that meet and exceed the demands of both NetworkIP and Jaduka customers.”

Jim Machi, Senior Vice President of Marketing for Dialogic added, “NetworkIP’s decision to move forward with Dialogic both validates and strengthens our value proposition to our customers who are looking to rapidly deploy innovative voice services in a variety of TDM, hybrid and IP network environments. We congratulate NetworkIP on the expansion of their platform and wish them continued success.”
