

Company Overview

At NetworkIP, Your Connections Are Our Commitment.

We're one company, but we manage billions of connections. And that means connecting you with the platform and tools that make your service more reliable, your brand more marketable and your business more profitable.

Our customers run their entire business — from facilities, to billing, to back office — on NetworkIP's Carrier-Grade Prepaid Platform that handles billions of calls, with no capital or back-office investment. Bringing more than a superior platform to prepaid, NetworkIP leads with prepaid's best value.

In prepaid since 1998, with services spanning Prepaid Services Platform, Prepaid Long Distance, Carrier Services and Prepaid Conferencing, NetworkIP offers the best combination of usage-based pricing, integrated prepaid services and features, quality and management controls.

ICS 8.0, the company's highly evolved, feature-rich Prepaid Services Network, features real-time, Web-based tools allowing providers to access and control all of their operations including call routing, branding and profitability tracking via the Internet. Plus, our patented iQTechnology® (iQT®) automatically routes calls for optimal call quality and termination — so our customers never lose a call, a customer, or a revenue opportunity.

Whether selling into niche markets or marketing nationwide, NetworkIP helps customers build, and better, their prepaid brands.
