

## NetworkIP Services Overview

# Prepaid Conferencing

### The world's premier prepaid audio-conferencing solution — only from NetworkIP.

NetworkIP's wholesale Prepaid Conferencing is a comprehensive, privately labeled turnkey solution for prepaid distributors, enabling them to brand their own conferencing product and generate new revenue from the booming small and medium-size business marketplace. Prepaid Conferencing combines toll-free access, long distance service, dialing attendees and reservationless conferencing from a single user account.

NetworkIP is the only company to offer true prepaid audio conferencing and the only company to offer multiple converged services on a single user account.

#### Generate revenue, today:

With no equipment or software to purchase, there are no capital investments required and resellers can start generating revenue, from day one.

#### Tap new profits from new sectors:

Enables distributors to brand their own conferencing product and tap the booming small and medium-size business marketplace, today.

#### User-friendly options:

Users are offered the choice of simply dialing in to setup and administer calls or using a Web interface to access the enhanced call management tools and features, so resellers can support all user preferences.

#### Features

- Easy-to-Use "Meet Me" Functionality - Call using any phone with toll-free access number
- One Conference Account Code to Remember - Never Changes!
- No Reservations or Operator Assistance Required
- Available 24 hours a Day
- No Commitment or Contracts
- Cost Effective - Rates 50%-75% lower than standard conferencing services
- Rechargeable with a Credit Card
- Advanced Account & Call Management Tools: Add/Mute/Hold participants, monitor call-in-progress, recharge account/add minutes, set security preferences and view call records.

#### Contact Information:

## NetworkIP Services Overview

# Prepaid Conferencing

### 100% prepaid:

Users purchase a prepaid account that is debited as they use the product, so users pay only for what they use — with no monthly subscription fees or other service charges.

### Feature-rich:

The Web Conferencing feature includes such tools as application/desktop sharing, document publishing, ability to send files to attendees, polling, chat and remote desktop control, making for a robust reseller offering.

### Benefits

- Privately Branded
- Cost Effective - Pay only for minutes used
- No Cost of Implementation or Maintenance
- Can Be Combined with other NetworkIP Applications on Same Account: (Prepaid Calling Cards and Prepaid Long Distance)
- Multiple Distribution Options (Card-based, Buy-a-PIN on the Web)
- Complete Web-based, Real-time Service Management Tools: Provisioning, Back Office Billing, Rate Management, PIN Activation/ Product Expiration, Profitability Reports and Customer Service Functionality.
