

# NetworkIP: Company Overview

## At NetworkIP, Your Connections Are Our Commitment.

And that means connecting you to the platform and tools that make your services more reliable, your brand more marketable and your business more profitable.

Since 1998, NetworkIP has been offering the best combination of usage-based pricing, call quality, hosted services platform, innovative technologies, and business management and reporting tools. Our customers run their entire business — from facilities, to billing, to back-office — on NetworkIP's award-winning, hosted services platform with no capital or back-office investment.

### NetworkIP delivers best-in-class performance for our customers across every category:

- **Odessi 3** – Next-generation business management and reporting tools
- **8th Generation Software (ICS 8.0)** – Industry's most evolved, customizable and proven platform
- **iQT®** – Call routing for optimal call quality and a better end-user experience
- **Cost** – Highest call quality-to-cost ratio
- **APIs** – Create customized Internet or wireless integrated products

**Whether selling regionally or taking on the global market, NetworkIP enables customers to build, grow and profit from their business.**
