

NetworkIP Services Overview:

Hosted Services Platform

It's Not Just a Platform – It's Your Platform to Profit.

If you're building and growing a successful prepaid brand, partnering with NetworkIP gives you access to the industry's most evolved services platform. That means reliability, cost-competitiveness and quality connections. Plus, advanced business management and reporting systems giving you the power to grow your business.

By utilizing NetworkIP's Hosted Services Platform, you'll be capable of running your entire business — from facilities, to billing, to back-office — just as if you owned your own switch, with no capital or back-office investment.

NetworkIP Technology Overview:

Hosted Services Platform

With NetworkIP, You Get it ALL!

Reliability

With switching facilities dispersed over three geographical regions, enterprise-grade data storage and backup and connections to over 65 international carriers, rest assured, your business is in good hands.

Cost-Competitiveness

As a NetworkIP customer, you can rely on predictable and competitive pricing — making it easier to market your products and profit from them.

Quality Connections (iQT®)

Through our patented iQTechnology, we ensure optimal call quality and a better end-user experience with a higher percentage of successful calls and fewer trouble tickets.

Power of Information (Odessi 3)

Benefit from the next-generation in back-office tools for managing and running your business with access to advanced inventory, billing and reporting functionality and consumer behavior analytics through a customizable web-based environment.

Capacity

NetworkIP has the power to support your business with over 6 million calls a day, over a billion end-user accounts and over 100K telephony ports.

Innovation (ICS8)

NetworkIP's hosted services platform is based on our Integrated Connections Solutions (ICS8) technology enabling customers to combine any of NetworkIP's superior services.
